EXPERIENCE

FRONT-END DEVELOPER

IT PROJECTS B. JASKÓLSKI | 2023 - Current

Stack: TypeScript, React, Redux (RTK), NodeJS, Express.

- Wrote and design UI of the applications in a team of 2 people.
- Fixed most of the bugs with stability.
- Participated in building video production application
- Delivered code in the following languages: JS, TS
- Created and maintained technical and non-technical documentation

FULL-STACK DEVELOPER

FREELANCE | 2022 - Current

Development and design for various industries, companies and people (tranport, science, finance, development industries)

Stack: React, Typescript, Next.js, NestJs, Express.js, GraphQL, UX/UI

FULL-STACK APPLICATION

MONOSHOP | LIVE LINK

I was working on the development of the Monoshop - a platform for buying/selling used branding clothes (something similar to Depop and Vinted).

Stack: TypeScript, React, Next.js, Redux (RTK), NestJs, PostgreSQL, Prisma, Socket.io, Stripe.

- Completely designed UI , wrote and deployed application
- Implemented authentication and authorization using access, efresh JWT tokens and Google OAuth
- Made build-in chat application using websockets where users can share info
- Built small library for filtering items
- Connected Stripe API for payment to the project using webhooks
- Implemented among others reviews, personal area, orders, pagination, filter etc.
